Installing Cisco AnyConnect for Ipad 2 and above

I prefer this method over others because, you will see, it shows your connected and transmitting data.

Search the app store for "Cisco anyconnect"

Install Cisco Any Connect

Enter you Apple ID and Password

Tap on "OK " to continue

Click on "Add VPN Connection" Tap on Server address and put "vpn.ufl.edu" then tap on DONE. Then choose a connection, choose VPN.UFL.EDU. It will prompt you for your username and password.
